

# **International Workshop on Nuclear Safety Regulation**

**18th January 2012**

**Tokyo / Japan**

## **Background of the Workshop**

- Japan is under reform on its nuclear safety organisation and regulation in response to the accident at TEPCO's Fukushima Nuclear Power Stations.
- During this process, it is important to learn lessons from approach and experience of nuclear safety regulation organisations in the world and hear suggestions from them.

## **Objectives of the Workshop**

- Share good practices of nuclear safety regulation organisations in the world.
- Share the vision of Japan's reform on nuclear safety organisation and regulation.
- Discuss how Japan could improve and implement its nuclear safety regulation system which ensures trusts from citizens.

## **Outline of the Workshop**

- **Organiser:** Cabinet Secretariat of Japan
- **Expected Participants:** Nuclear Safety Regulation Organisations (France, Republic of Korea, UK, US), International Organisations (IAEA, OECD/NEA), Experts in Japan (Members of Advisory Committee), Japanese Administrations (MOFA, MEXT, NISA, MOE)
- **Language:** English (English / Japanese simultaneous translation)
- **Openness:** Open to media (Photos are permitted only at the opening session.)
- **Output of the workshop:** Report of the Workshop (After the workshop, the report will be distributed by email, checked by participants and finally shared.)
